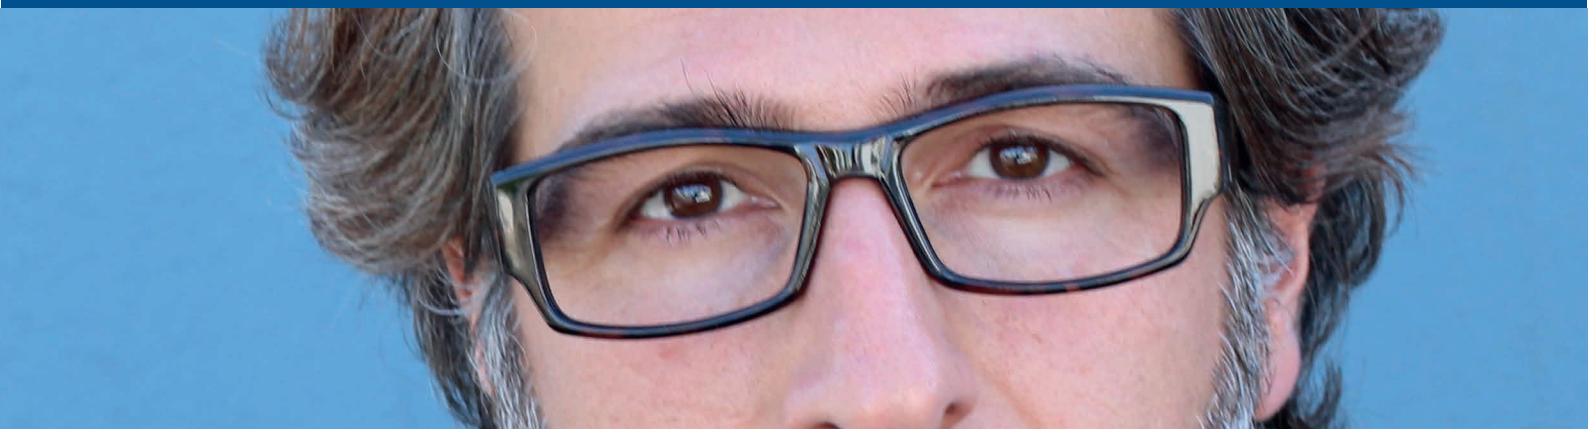
CROSSBOWS
optical

Our most popular design, Basic is an excellent all purpose progressive design

Strong vision across all applications

The Basic Soft design provides a low distortion

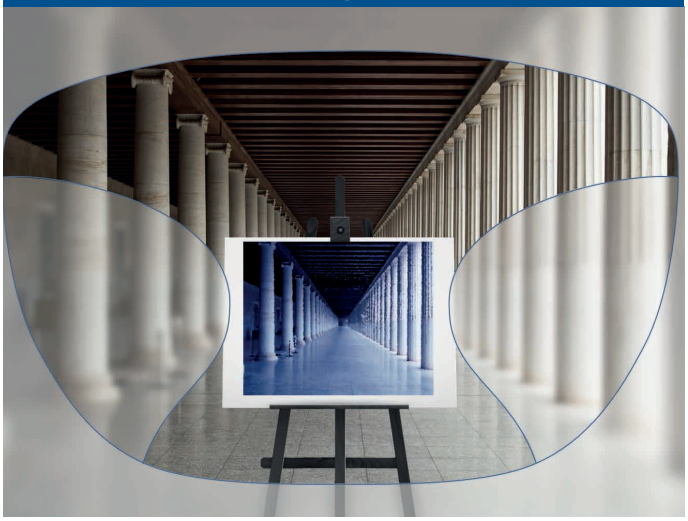
Bringing Innovation & Vision To A Clearer Digital Future



The **Basic** design is an excellent all purpose progressive design and comes in corridor lengths ranging from 13 mm to 18 mm with a minimum height of 14 mm. It is available in two variants, **Basic Soft** and **Basic Hard**.

Our most popular design, the **Basic** is our entry level progressive freeform which provides the wearer with strong vision across all applications; distance, intermediate, reading and is a comfortable optical solution.

Soft Design Option



Excellent entry level all purpose progressive design which provides strong performance in all visual fields.

Benefits

An extremely comfortable design, with lower overall astigmatism.
