# WHY DO WE COLLECT AND USE INFORMATION ABOUT YOU?

The College is required by law to protect the public funds it administers and is required to share information provided to it with other bodies responsible for auditing or administering public funds, in order to prevent and detect fraud.

On behalf of the Auditor General for Scotland, Audit Scotland appoints the auditor to audit the accounts of the College. It is also responsible for carrying out data matching exercises as part of the National Fraud Initiative. The NFI runs every two years and uses data matching to compare information that different public bodies hold about individuals, and that might suggest the existence of fraud or error.

Data matching involves comparing computer records held by one body against other computer records held by the same or another body to see how far they match. This will include personal information. Computerised data matching allows potentially fraudulent claims and payments to be identified but the inclusion of personal data within a data matching exercise does not mean that any specific individual is under suspicion. Where a match is found it indicates that there may be an inconsistency that requires further investigation. No assumption can be made as to whether there is fraud, error or other explanation until an investigation is carried out. The exercise can also help bodies to ensure that their records are up to date.

NESCol is required to provide specific sets of data to Audit Scotland for matching purposes. Information on the data sets can be found at: https://www.audit-scotland.gov.uk/report/the-national-fraud-initiative-in-scotland

# **OUR LAWFUL BASIS FOR THE PROCESSING**

The College lawful basis for processing data for NFI purposes is:

• GDPR Article 6 (c) – processing is necessary for compliance with a legal obligation to which the controller is subject.

The use of data by Audit Scotland in a data matching exercise is carried out under their statutory authority, normally under its powers in Part 2A of the Public Finance and Accountability (Scotland) Act 2000. It does not require the consent of the individuals concerned under the Data Protection Act 2018. Data matching by Audit Scotland is subject to a Code of Practice.
