1. Introduction

North East Scotland College (NESCol) is committed to ensuring all clients and customers receive the best possible service. The College monitors stakeholder complaint feedback and ensures any lessons learned are actioned to improve its services. Reports measuring the College's complaints handling performance will be published online quarterly and issued to the Leadership Team.

NESCol complaints handling procedures are subject to regular review and alteration as required. This could be as a result of stakeholder experiences, internal changes or external initiatives. The College is a member of the sector Complaints Handling Advisory Group, operating with the College Development Network (CDN) and in association with the Scottish Public Sector Ombudsman (SPSO).

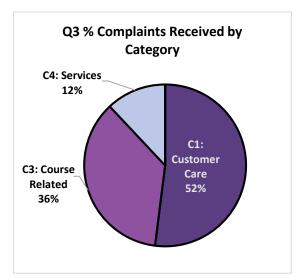

NESCol is an equal opportunities College therefore all complaints are administered in compliance with the Data Protection Act 2018, The General Data Protection Regulation (GDPR) and Freedom of Information (Scotland) Act 2002.

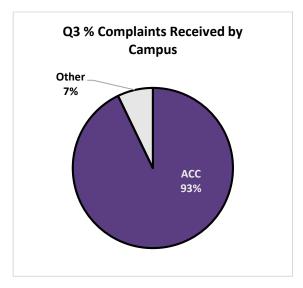

2. Quarterly Trends

For this quarter, NESCol received 14 complaints. The majority of complaints made were Customer Care Related (C1), Course Related (C3) and College Services (C4). Common themes regarding the cause of complaints are:

- Assessment, Exams & Certification
- Bursary/Funding issues
- Diversity & Equality
- Learning & Teaching
- Staff conduct

The pie chart to the left shows the percentage of complaints received for each complaint category. The pie chart to the right shows a breakdown of the percentage of complaints received this quarter for each campus. Of the complaints received this quarter, Aberdeen City received 13 and one complaint was raised in relation to 'other' college locations.

3. Impact on Service Delivery

Upon closing a complaint, the quality team request details of any lessons learned or actions for completion (where applicable) from the relevant departments. The feedback received from stakeholders through the complaints process can alter our service delivery and highlight areas for improvement in order to better our practices. The below example/s from this quarter highlights the value of stakeholder feedback.

Improving communication around funding

A complaint was received regarding a member of staff speaking out of turn to a student on the phone in regards to their course funding request. The actions that have been raised in response to this complaint focus on the need for a single point of contact for students in connection with their funding queries, which has since been implemented.

Improving self-evaluation among teaching staff

A complaint was received regarding the delay in feedback to a student after an assessment. Staff were reminded to be professional when dealing with student questions, and to discuss course expectations with students. In addition, teaching staff will use a process of self-evaluation when preparing courses, units and delivery methods.

Improving distance learning data protection

A complaint was received regarding the handling of personal data. In addition, a survey was sent too early to this student. Upon reviewing the complaint, actions were put in place to improve data protection, and to send surveys out after milestone 3, instead of milestone 2. Surveys were also made non mandatory for distance learners.

4. Further Education Complaints Performance Indicators – Definitions

The following definitions for stage 1, stage 2, and escalated should be consistently applied throughout all indicators.

Stage 1

This means those responded to at stage 1 (frontline resolution). This does not include those escalated from stage 1 to stage 2. These will be counted in the escalated complaints. This includes those where the extended timeline (i.e. + additional 5 working days) was used.

Stage 2

This means those responded to at stage 2 (investigation). This includes those where the extended timeline (i.e. + additional 20 working days) was used.

This refers to those complaints considered directly at stage 2 for the following reasons:

- * straight away by complainant (this refers to customers who did not wish to be dealt with at stage 1 and wished to go straight to stage 2)
- * straight away by the College, or within a day or so after due consideration (i.e. College recognised complex, serious, high risk nature of the complaint and felt it was not suitable to be considered at stage 1)

Escalated

This means those escalated from stage 1 to stage 2.

This refers to those complaints where the complainant remains dissatisfied with the outcome of the frontline resolution and have requested that their case be escalated to stage 2 for investigation.

This includes those complaints where escalation was required because frontline resolution timescales were not met (i.e. 11 working days or more). Therefore automatic escalation rules apply.

Population

This figure will represent the total student population. For example the number of matriculated students at an agreed date.

The College, when reporting on the complaints handling KPIs for each quarter adheres to the above definitions to ensure consistency and accuracy.

6. Escalation and Extension Rationale

In this quarter, one complaint was escalated due to the Easter holidays and staff being on leave, therefore the matter needed more time to be investigated.

In this quarter, three complaints were given an extension. One complaint was extended because the complaint handler could not get in touch with the student to discuss their complaint fully. Another complaint was extended in order to allow staff further time to investigate the details of the complaint. In addition, a complaint was extended due to the complaint handler illness, therefore more time was needed to investigate the complaint.

7. Complaints Handling Feedback Questionnaire

Following the receipt of a response to their complaint, complainants are sent a complaints handling questionnaire so they can indicate their satisfaction with the different components of the complaints process.

This is monitored on a regular basis and the quality team review feedback received in relation to the handling process. This can influence future practice and alterations to procedures applied.
