SEKERS

ABOUT

Sekers introduces Fifties, a sophisticated wide-width sheer collection designed for contract hospitality and leisure interiors. The range features five distinctive designs, each available in five complementary colourways.

Inspired by the glamour of 1950s evening gowns, this sheer collection captures the elegance, light, and sophistication of mid-century couture. Drawing on the layered textures, subtle shimmer, and refined silhouettes of iconic Sekers-style dresses, the designs translate couture detailing into contemporary sheers. Soft transparency, architectural weaves, and delicate sparkle reflect the way 1950s gowns moved and caught the light - understated, feminine, and effortlessly glamorous.

Meeting global recycling standards, the collection reflects Sekers' ongoing commitment to sustainability, while offering a flame-retardant sheer suited to the demands of the contract market. All five designs drape beautifully to softly diffuse light, creating an elegant and welcoming atmosphere for hotels, resorts, and premium leisure spaces.

This collection reinterprets Sekers heritage through a contemporary lens, balancing delicacy with structure, and subtle radiance with timeless sophistication. From quiet, architectural sheers to softly sparkling textures, each fabric reflects a different expression of evening glamour

DESIGNS

FIFTIES

Cadillac

Cadillac is the most restrained of the group: clean, even, and quietly refined, with its uniform weave and soft sheen

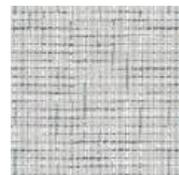

Glitz

Glitz radiates understated glamour: a sheer delicately embellished with light-catching sequins in a refined, grid-like structure. Soft variations in tone and colour give it depth and a sophisticated, iridescent shimmer

Fantasy

An airy, structured open-weave fabric, where two understated tones combine to evoke depth and subtle visual texture.

Marquee

Marquee echoes the delicate charm of Fantasy, yet its defined weave introduces a rhythmic pattern, giving the fabric a more relaxed, effortless sophistication.

Twinkle

Twinkle combines delicacy with enchantment: fine, intertwined yarns form a subtle diamond motif that catches the light in a softer, more scattered way than Glitz.
