

Cobot Trolley

1 Aluminium machines tabletop with fixturing tapped holes (610mm x 1140mm)

2 Ability to add safety devices (not included)

3 Customisable logo with a backlight powered via internal socket. Lockable doors and shelving to rear.

4 Robust castors with ratchet machine mounts to provide stability

Cobot Trolley

Cobots are very adaptable and are often required to be moved between production and applications when required. Stability of the cobot is crucial, along with the ability to store equipment, house tooling and ease of moving between areas. The SP trolley has been designed with all of these taken into consideration. Designed and manufactured by SP to the same high standards of the automation solutions they are involved in.

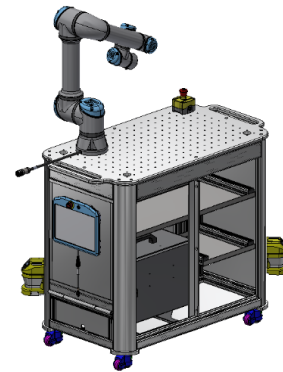

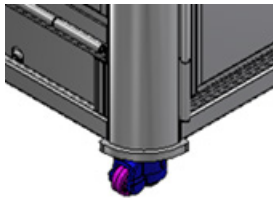

Mountings

- Aluminium tabletop with tapped holes for fixtures/UR mounting
- UR cable holes for connecting to controller
- Integral handles for moving trolley

Internals

- Storage for UR controller
- Shelving for tool storage
- Lockable rear doors
- Access flap to allow pendant to be mounted on the side
- Internal power socket

Stability

- Mounted on castors for portability
- Machine mount ratchets for levelling
- Simple to use and sturdy

Features & Benefits

- Large aluminium tabletop
- Easily moved between workstations
- Robust engineering
- Additional Safety devices can be added
- Internal shelving and power socket
- Backlit customisable logo
