

AUTOMOTIVE

SP Technology Automation & Robotics

Over the years SP Technology has supplied a wide range of machines and bespoke automated solutions to the automotive industry. From processing of interiors to the assembly of steering systems. Our bespoke automated solutions have been able to solve manufacturing problems that could not otherwise have been done using traditional methods. Other applications have included; timing belt manufacturing, tyre pressure sensor assembly, interior moulding prep and robotic welding.

Key features and equipment:

- Full poke yoke methodology
- Vision inspection systems
- High definition printing machines
- Robotic welding machines
- Automated drilling and tapping systems
