Streamtec case study

Enhancing Communication with Digital Signage

Robert Gordon University sought to enhance communication and engagement within its Sir Ian Wood Building by installing a prominent large-format display in a high-traffic area – the façade of the Engineering Walkway within the main entrance corridor. Streamtec provided a straightforward and effective solution to meet this need.

Solutions Implemented:

Streamtec supplied, installed, and commissioned a complete large screen signage solution, comprising of:

- One 98" Signage Screen
- Robust Mounting Bracket
- Professional Installation and Commissioning

Outcomes Achieved:

The installation of the 98" signage screen has provided Robert Gordon University with:

- Enhanced Campus Communication
- Improved Engagement
- Modern and Professional Appearance
- Turnkey Solution

This project demonstrates our ability to deliver effective and straightforward digital signage solutions that meet specific communication needs within educational environments.
